Data Protection Policy

01/09/2019

DAME HANNAH ROGERS SCHOOL

EDUCATION

Title:	Data Protection Policy
Policy Category:	Education
Authors:	Jason Ryder
Consultation process:	Head Teacher, staff, IT Manager, Clerk to Governors, Stakeholders.
Ratification date and group:	01/09/2017
Publication date:	01/09/2019
Review date:	30/04/2020
Committee, group or individual monitoring the document:	Head Teacher, Governors / IT Manager / Clerk to Governors
Resources and regulatory base:	Data Protection Act 1988 The Education (Pupil Information) (England) Regulations 2005 Education (Information) (Miscellaneous Amendments) (England) Regulations 2015. Data Handling Procedure in Government
Links to additional policies:	Data Protection - Privacy Notices Policy - CURRENT Online Safety Policy School Technical Security Policy

TABLE OF CONTENTS

INTRODUCTION

Schools and their employees should do everything within their power to ensure the safety and security of any material of a personal or sensitive nature

It is the responsibility of all members of the school community to take care when handling, using or transferring personal data that it cannot be accessed by anyone who does not:

- have permission to access that data, and / or
- need to have access to that data.

Data breaches can have serious effects on individuals and / or institutions concerned, can bring the school into disrepute and may well result in disciplinary action, criminal prosecution and fines imposed by the Information Commissioners Office - for the school and the individuals involved. Particularly, all transfer of data is subject to risk of loss or contamination.

Anyone who has access to personal data must know, understand and adhere to this policy, which brings together the legal requirements contained in relevant data protection legislation and relevant regulations and guidance (where relevant from the Local Authority).

The Data Protection Act (DPA) lays down a set of rules for processing of personal data (both structured manual records and digital records). It provides individuals (data subjects) with rights of access and correction. The DPA requires organisations to comply with eight data protection principles, which, among others require data controllers to be open about how the personal data they collect is used.

DATA PROTECTION PRINCIPLES

The Data Protection Act 1998 establishes eight enforceable principles that must be adhered to at all times:

1. Personal data shall be processed fairly and lawfully;
2. Personal data shall be obtained only for one or more specified and lawful purposes;
3. Personal data shall be adequate, relevant and not excessive;
4. Personal data shall be accurate and where necessary, kept up to date;
5. Personal data processed for any purpose shall not be kept for longer than is necessary for that purpose or those purposes;
6. Personal data shall be processed in accordance with the rights of data subjects under the Data Protection Act 1998;
7. Personal data shall be kept secure ie protected by an appropriate degree of security;
8. Personal data shall not be transferred to a country or territory outside the European Economic Area, unless that country or territory ensures an adequate level of data protection.

WHAT IS PERSONAL INFORMATION?

The DPA defines “Personal Data” as data which relates to a living individual who can be identified.

See also http://ico.org.uk/for_organisations/data_protection/the_guide/key_definitions for more information):

- from those data, or
- from those data and other information which is in the possession of, or is likely to come into the possession of, the data controller,

and includes any expression of opinion about the individual and any indication of the intentions of the data controller or any other person in respect of the individual.

It further defines “Sensitive Personal Data” as personal data consisting of information as to:

- the racial or ethnic origin of the data subject
- their political opinions
- their religious beliefs or other beliefs of a similar nature
- whether they are a member of a trade union (within the meaning of the Trade Union and Labour Relations (Consolidation) Act 1992)
- their physical or mental health or condition
- their sexual life
- the commission or alleged commission by them of any offence, or
- any proceedings for any offence committed or alleged to have been committed by them, the disposal of such proceedings or the sentence of any court in such proceedings

See also the guidance on the Information Commissioner’s Office website: http://www.ico.gov.uk/for_organisations/data_protection_guide.aspx

POLICY STATEMENTS

The school will hold the minimum personal data necessary to enable it to perform its function and it will not hold it for longer than necessary for the purposes it was collected for.

Every effort will be made to ensure that data held is accurate, up to date and that inaccuracies are corrected without unnecessary delay.

All personal data will be fairly obtained in accordance with the “Data Protection - Privacy Notice Policy” and lawfully processed in accordance with the conditions for Processing.

PERSONAL DATA

The school and individuals will have access to a wide range of personal information and data. The data may be held in a digital format or on paper records. Personal data is defined as any combination of data items that identifies an individual and provides specific information about them, their families or circumstances. This will include:

- Personal information about members of the school community – including pupils / students, members of staff and parents / carers eg names, addresses, contact details, legal guardianship contact details, health records, disciplinary records
- Curricular / academic data eg class lists, pupil / student progress records, reports, references
- Professional records eg employment history, taxation and national insurance records, appraisal records and references
- Any other information that might be disclosed by parents / carers or by other agencies working with families or staff members.

RESPONSIBILITIES

The school's Senior Information Risk Officer (SIRO) and Data Protection Officer (DPO) is the Head Teacher. They will keep up to date with current legislation and guidance and will:

- determine and take responsibility for the school's information risk policy and risk assessment
- appoint the Information Asset Owners (IAOs)

The school will identify Information Asset Owners (IAOs) these being the Head Teacher for pupil / student information and assessment data and the Director of People for all staff information. The IAOs will manage and address risks to the information and will understand:

- what information is held, for how long and for what purpose,
- how information has been amended or added to over time, and
- who has access to protected data and why.

Everyone in the school has the responsibility of handling protected or sensitive data in a safe and secure manner.

Governors are required to comply fully with this policy in the event that they have access to personal data, when engaged in their role as a Governor.

REGISTRATION

The school is registered as a Data Controller on the Data Protection Register held by the Information Commissioner.

INFORMATION TO PARENTS / CARERS – THE "DATA PROTECTION - PRIVACY NOTICES POLICY"

In order to comply with the fair processing requirements of the DPA, the school will inform parents / carers of all pupils / students of the data they collect, process and hold on the pupils / students, the purposes for which the data is held and the third parties (eg LA, DfE, etc) to whom it may be passed. This Data Protection - Privacy Notices Policy will be passed to parents / carers with the annual education consents. Parents / carers of young people who are new to the school will be provided with the privacy notice with their placement offer letter.

TRAINING AND AWARENESS

All staff will receive data handling awareness / data protection training and will be made aware of their responsibilities, as described in this policy through:

- Induction training for new staff
- Staff meetings / briefings
- Day to day support and guidance from Information Asset Owners

RISK ASSESSMENTS

Information risk assessments will be carried out by Information Asset Owners to establish the security measures already in place and whether they are the most appropriate and cost effective. The risk assessment will involve:

- Recognising the risks that are present;
- Judging the level of the risks (both the likelihood and consequences); and
- Prioritising the risks.

Risk assessments are an ongoing process and should result in the completion of an Information Risk Actions Form (example below):

Risk ID	Information Asset affected	Information Asset Owner	Protective Marking (Impact Level)	Likelihood	Overall risk level (low, medium, high)	Action(s) to minimise risk

IMPACT LEVELS AND PROTECTIVE MARKING

Following incidents involving loss of data, the Government recommends that the Protective Marking Scheme should be used to indicate the sensitivity of data. The Protective Marking Scheme is mapped to Impact Levels as follows:

Government Protective Marking Scheme label	Impact Level (IL)	Applies to schools?
Not Protectively Marked	0	Will apply in schools
Protect	1 or 2	
Restricted	3	
Confidential	4	Will not apply in schools
Highly Confidential	5	
Top Secret	6	

Most student / pupil or staff personal data that is used within educational institutions will come under the PROTECT classification. However some, eg the home address of a child (or vulnerable adult) at risk will be marked as RESTRICTED.

The school will ensure that all school staff, independent contractors working for it, and delivery partners, comply with restrictions applying to the access to, handling and storage of data classified as Protect, Restricted or higher. Unmarked material is considered 'unclassified'. The term 'UNCLASSIFIED' or 'NON' or 'NOT PROTECTIVELY MARKED' may be used to indicate positively that a protective marking is not needed.
Users must be aware that when data is aggregated the subsequent impact level may be higher than the individual impact levels of the original data. Combining more and more individual data elements together in a report or data view increases the impact of a breach. A breach that puts students / pupils at serious risk of harm will have a higher impact than a risk that puts them at low risk of harm. Long-term significant damage to anyone's reputation has a higher impact than damage that might cause short-term embarrassment.

Release and destruction markings should be shown in the footer eg. "Securely delete or shred this information when you have finished using it".

SECURE STORAGE OF AND ACCESS TO DATA

The school will ensure that systems are set up so that the existence of protected files is hidden from unauthorised users and that users will be assigned a clearance that will determine which files are accessible to them. Access to protected data will be controlled according to the role of the user. Members of staff will not, as a matter of course, be granted access to the whole management information system.

All users will use strong passwords which must be changed regularly (see also Online Safety Policy and School Technical Security Policy for more information). User passwords must never be shared.

Personal data may only be accessed on machines that are securely password protected. Any device that can be used to access data must be locked if left (even for very short periods) and set to auto lock if not used for five minutes.

All storage media must be stored in an appropriately secure and safe environment that avoids physical risk, loss or electronic degradation.

Personal data can only be stored on school equipment (this includes computers and portable storage media (where allowed). Private equipment (ie owned by the users) must not be used for the storage of personal data.

When personal data is stored on any portable computer system, USB stick or any other removable media:

- the data must be encrypted and password protected,
- the device must be password protected (many memory sticks / cards and other mobile devices cannot be password protected),
- the device must offer approved virus and malware checking software (memory sticks will not provide this facility, most mobile devices will not offer malware protection), and
- the data must be securely deleted from the device, in line with school policy (below) once it has been transferred or its use is complete.

The school has clear policy and procedures for the automatic backing up, accessing and restoring all data held on school systems, including off-site backups.

The school has clear policy and procedures for the use of “Cloud Based Storage Systems” (for example Dropbox, google apps and google docs) and is aware that data held in remote and cloud storage is still required to be protected in line with the Data Protection Act. The school will ensure that it is satisfied with controls put in place by remote / cloud based data services providers to protect the data.
As a Data Controller, the school is responsible for the security of any data passed to a “third party”. Data Protection clauses will be included in all contracts where data is likely to be passed to a third party.

All paper based Protected and Restricted (or higher) material must be held in lockable storage, whether on or off site.

Rights of access to information

There are two distinct rights of access to information held by organisations about individuals and pupils.

1. Under Section 7 of the Data Protection Act 1998 http://www.legislation.gov.uk/ukpga/1998/29/section/7 data subjects have a number of rights in connection with their personal data, the main one being the right of access. Procedures are in place to deal with Subject Access Requests ie a written request to see all or a part of the personal data held by the data controller in connection with the data subject. Data subjects have the right to know: if the data controller holds personal data about them; a description of that data; the purpose for which the data is processed; the sources of that data; to whom the data may be disclosed; and a copy of all the personal data that is held about them. Under certain circumstances the data subject can also exercise rights in connection with the rectification; blocking; erasure and destruction of data. See also Subject Access Requests below.

2. The right of those entitled to have access to curricular and educational records as defined within The Education (Pupil Information) (England) Regulations 2005 and subsequent amendment within the Education (Information) (Miscellaneous Amendments) (England) Regulations 2015.

These procedures relate to subject access requests made under the Data Protection Act 1998.

Subject Access Request

1. Requests for information must be made in writing; which includes email, and be addressed to the Head Teacher. If the initial request does not clearly identify the information required, then further enquiries will be made.

2. The identity of the requestor must be established before the disclosure of any information, and checks should also be carried out regarding proof of relationship to the child. Evidence of identity can be established by requesting production of:
   - passport
   - driving licence
   - utility bills with the current address
   - Birth / Marriage certificate
   - P45 / P60
   - Credit Card or Mortgage statement

   This list is not exhaustive.

3. Any individual has the right of access to information held about them. However with children, this is dependent upon their capacity to understand (normally age 12 or above) and the nature of the request. The Head Teacher should discuss the request with the child and take their views into account when making a decision. A child with competency to understand can refuse to consent to the request for their records. Where the child is not deemed to be competent an individual with parental responsibility or guardian shall make the decision on behalf of the child.

4. The Trust may make a charge for the provision of information, dependent upon the following:

- Should the information requested contain the educational record then the amount charged will be dependent upon the number of pages provided.
- Should the information requested be personal information that does not include any information contained within educational records the Trust can charge up to £10 to provide it.
- If the information requested is only the educational record viewing will be free, but a charge not exceeding the cost of copying the information can be made by the Head Teacher.

5. The response time for subject access requests, once officially received, is 40 days. However the 40 days will not commence until after receipt of fees or clarification of information sought.

6. The Data Protection Act 1998 allows exemptions as to the provision of some information; therefore all information will be reviewed prior to disclosure.

7. Third party information is that which has been provided by another, such as the Police, Local Authority, Health Care professional or another Trust or School. Before disclosing third party information consent should normally be obtained. There is still a need to adhere to the 40 day statutory timescale.

8. Any information which may cause serious harm to the physical or mental health or emotional condition of a pupil, service user, or another should not be disclosed, nor should information that would reveal that the someone, child or adult, is at risk of abuse, or information relating to court proceedings.

9. If there are concerns over the disclosure of information then additional advice should be sought.

10. Where redaction (information blacked out / removed) has taken place then a full copy of the information provided should be retained in order to establish, if a complaint is made, what was redacted and why.

11. Information disclosed should be clear, thus any codes or technical terms will need to be clarified and explained. If information contained within the disclosure is difficult to read or illegible, then it should be retyped.

12. Information can be provided at the Trust offices with a member of staff on hand to help and explain matters if requested, or provided at a face to face handover. The views of the applicant should be taken into account when considering the method of delivery. If postal systems have to be used then 'signed for' mail must be used.

SECURE TRANSFER OF DATA AND ACCESS OUT OF SCHOOL

The school recognises that personal data may be accessed by users out of school, or transferred to the LA or other agencies. In these circumstances:

- Users may not remove or copy sensitive or restricted or protected personal data from the school or authorised premises without permission and unless the media is encrypted and password protected and is transported securely for storage in a secure location
- Users must take particular care that computers or removable devices which contain personal data must not be accessed by other users (eg family members) when out of school

- When restricted or protected personal data is required by an authorised user from outside the organisation's premises (for example, by a member of staff to work from their home), they should preferably have secure remote access to the management information system;
- If secure remote access is not possible, users must only remove or copy personal or sensitive data from the organisation or authorised premises if the storage media, portable or mobile device is encrypted and is transported securely for storage in a secure location;
- Users must protect all portable and mobile devices, including media, used to store and transmit personal information using approved encryption software; and
- Particular care should be taken if data is taken or transferred to another country, particularly outside Europe, and advice should be taken from the local authority (if relevant) in this event.

DISPOSAL OF DATA

The school will comply with the requirements for the safe destruction of personal data when it is no longer required.

The disposal of personal data, in either paper or electronic form, must be conducted in a way that makes reconstruction highly unlikely. Electronic files must be securely overwritten, in accordance with government guidance, and other media must be shredded, incinerated or otherwise disintegrated for data.

A Destruction Log should be kept of all data that is disposed of. The log should include the document ID, classification, date of destruction, method and authorisation.

AUDIT LOGGING / REPORTING / INCIDENT HANDLING

It is good practice, as recommended in the "Data Handling Procedures in Government" document that the activities of data users, in respect of electronically held personal data, will be logged and these logs will be monitored by responsible the Head Teacher.

The audit logs will be kept to provide evidence of accidental or deliberate data security breaches – including loss of protected data or breaches of an acceptable use policy, for example.

The school has a policy for reporting, managing and recovering from information risk incidents, which establishes:

- a "responsible person" for each incident;
- a communications plan, including escalation procedures;
- and results in a plan of action for rapid resolution; and
- a plan of action of non-recurrence and further awareness raising.

All significant data protection incidents must be reported through the SIRO to the Information Commissioner's Office based upon the local incident handling policy and communication plan.

USE OF TECHNOLOGIES AND PROTECTIVE MARKING

The following provides a useful guide:

	The information	The technology	Notes on Protect Markings (Impact Level)
School life and events	School terms, holidays, training days, the curriculum, extra-curricular activities, events, displays of pupils work, lunchtime menus, extended services, parent consultation events	Common practice is to use publically accessible technology such as school websites or portal, emailed newsletters, subscription text services	Most of this information will fall into the NOT PROTECTIVELY MARKED (Impact Level 0) category.
Learning and achievement	Individual pupil / student academic, social and behavioural achievements, progress with learning, learning behaviour, how parents can support their child's learning, assessments, attainment, attendance, individual and personalised curriculum and educational needs.	Typically schools will make information available by parents logging on to a system that provides them with appropriately secure access, such as a Learning Platform or portal, or by communication to a personal device or email account belonging to the parent.	Most of this information will fall into the PROTECT (Impact Level 2) category. There may be students/ pupils whose personal data requires a RESTRICTED marking (Impact Level 3) or higher. For example, the home address of a child at risk. In this case, the school may decide not to make this pupil / student record available in this way.
Messages and alerts	Attendance, behavioural, achievement, sickness, school closure, transport arrangements, and other information that it may be important to inform or contact a parent about as soon as possible. This may be particularly important when it is necessary to contact a parent concerning information that may be considered too sensitive to make available using other online means.	Email and text messaging are commonly used by schools to contact and keep parents informed. Where parents are frequently accessing information online then systems e.g. Learning Platforms or portals, might be used to alert parents to issues via "dashboards" of information, or be used to provide further detail and context.	Most of this information will fall into the PROTECT (Impact Level 1) category. However, since it is not practical to encrypt email or text messages to parents, schools should not send detailed personally identifiable information. General, anonymous alerts about schools closures or transport arrangements would fall into the NOT PROTECTIVELY MARKED (Impact Level 0) category.

AMENDMENT RECORD AND REVISION HISTORY

Procedures are reviewed annually to ensure relevance to the system and processes.

A record of contextual additions or omissions is given below.

Date	Page	Addition or Omission	Context	Initial	Version
